Read all through the instructions before use.

⚠ WARNING

When a rear-facing child safety seat such as the Saab Child Seat is fitted in the centre position of the rear seat in the Saab 900 M94- 3D/5D, Saab 9-3 3D/5D and Saab 9-5 4D, the centre armrest must be secured in place with this strap. If this is not done, the centre armrest could swing down in the event of a frontal collision.

- 1 Lower the centre armrest and long-load hatch.
- 2 Fit the strap round the long-load hatch and close it, making sure that it locks properly in place.
- 3 Fold up the centre armrest.
- 4 Secure the centre armrest with the safety strap just above the centre armrest's strap.

Do not tighten the strap so hard that the centre armrest is deformed.
